

**Postdoctoral position on resilience of mountain grasslands in a globalization context
in Eric Lambin's research team, University of Louvain (Belgium)**

Professor Eric Lambin seeks applications for a 2-year full-time postdoctoral research position to work on a new collaborative research project on human-environment interactions in marginal grasslands and their resilience to global environmental and social changes in mountain environments of Europe. The research will focus on whether regional integration and globalization enhance or threaten resilience of these grasslands through their effects on movements of goods, people and information. Study sites are located in the French and Austrian Alps, where other teams will also conduct research as part of the project.

The successful candidate will be based at the *Earth and Life Institute* of the University of Louvain (Louvain-la-Neuve, Belgium). Applicants will have research experience in the field of land use change and human-environmental studies and should speak English and French. Expected starting date is summer 2013.

Candidates should send a curriculum vitae, recent publications, and the name of three persons who could provide recommendations to Professor Eric Lambin: eric.lambin@uclouvain.be. The search will remain open until a suitable candidate is found.
